

Asthma Medications at School

Dear DWS Families,

Here at DWS, we are committed to working with families to establish asthma management and support systems to promote a safe and healthy school environment.

Listed below are steps taken to help accomplish this goal:

1. Written parental permission must be on file in order for any child to use an inhaler while at school. Please sign and date the enclosed form.*
2. A copy of the prescription from the child's physician must be on file. The enclosed form must be signed and dated by the child's physician. The form can be faxed directly to the school at 313.822.4030.*
3. We would like to suggest that children in the lower grades (CC-4th) keep their inhalers in the school office. We will keep a record for each student who comes to the office to use his or her inhaler. This will allow the office staff to track your child's inhaler use and inform the teacher and parents of any concerns or problems.

Please feel free to contact me with any questions or concerns.

Sincerely,

Linda Brooks
Administrator

* Please complete School-Based Asthma Management Plan form.
